RELEVANT CERTIFICATIONS & SKILLS

- **Certifications:** AWS Solutions Architect Pro & DevOps Engineer Pro, Certified Kubernetes Administrator (CKA), Red Hat Certified Engineer (RHCE) & System Administrator (RHCSA), CompTIA Security+, Certified Cisco Network Associate (CCNA)
- **Skills:** AWS, Linux, Kubernetes, Scripting/Automation (Python, Bash, Powershell, Ansible), DevOps, IaC (Terraform/CDK/CloudFormation), Observability (CloudWatch/Grafana/Prometheus/Splunk), CI/CD (git), Cybersecurity, Networking

RELEVANT WORK EXPERIENCE

Principal Systems Administrator | CACI International Inc. | Remote (FL) | May 2026 - Present

Senior Systems Administrator | CACI International Inc. | Remote (FL) | Jan 2025 - May 2026

- Engineer, manage, and optimize a hybrid AWS/on-premises Linux infrastructure with over 75 servers for the USMC.
- Reduce AWS costs by \$50K per month through service integrations, right-sizing, and environment optimization.
- Implement IaC using Terraform, CloudFormation, and Ansible to automate 200+ resources across 4 environments.
- Automate Red Hat Linux system administration (configuration, patching, hardening) using Bash, Ansible, Python.
- Lead multi-tier (db, app, auth, web) cloud-to-cloud app migration, improving availability, reliability, and maintainability.
- Build Kubernetes observability platform using Prometheus/Grafana, integrating AWS CloudWatch and SNS alerting.
- Containerize workloads with Kubernetes/ECS for testing, administration, and legacy application support.
- Provide AWS solutions architecture, engineering, and Linux systems administration for AI/ML teams.
- Support agile deployments through infrastructure provisioning, troubleshooting, and release implementations.

Information Assurance Engineer | General Dynamics Mission Systems | Cape Canaveral, FL | May 2024 - Jan 2025

- Administered mission-critical RHEL systems for the U.S. Navy, managing reliability, IAM, and configuration management.
- Developed automated STIG hardening, patching, and vulnerability scanning workflows integrating Nessus for compliance.
- Automated provisioning and configuration management using Ansible, Bash, and Python, reducing configuration drift.
- Built Splunk dashboards for observability and alerting, reducing MTTR across compute, storage, and network layers.

Systems Administrator | RGNext (Raytheon/General Dynamics) | Cape Canaveral, FL | June 2023 - May 2024

- Administered mission-critical distributed Red Hat Linux/Unix infrastructure for DoD and commercial launch operations.
- Engineered Bash and Python automation for monitoring and maintaining 40+ geographically dispersed sensor sites.
- Performed system troubleshooting, configuration, and upgrades across application, database, and network layers.
- Executed backup, security assessments, and vulnerability remediation to ensure compliance with DoD IA requirements.

IP Network Operations Specialist | L3Harris Technologies | Melbourne, FL | Feb 2023 - June 2023 (Sub-Contract)

- Supported FAA telecommunications infrastructure maintaining 99.999% uptime SLA across 4000+ sites nationwide.
- Resolved critical software, hardware, and networking incidents through coordination with carriers and internal teams.
- Securely configured Cisco network infrastructure, supporting mission-critical air traffic communications.

Network Operations Center Specialist II | Health First | Rockledge, FL | June 2022 - Feb 2023

- Supported critical infrastructure for 4 hospitals and 60+ medical facilities with 24/7 incident response and management.
- Developed Python automation for operational workflows including web scraping, data processing, and administration.
- Managed 10,000+ Active Directory and Azure AD accounts, troubleshooting authentication and anomalous login activity.

EDUCATION

MS, Computer Science

Western Governors University

2026

Salt Lake City, Utah

BS, Network Engineering and Security

Western Governors University

2023

Salt Lake City, Utah
